Project volume: approx. 130.000€

Project time: 2016

Project description: Realization of a highly available and highly redundant vSAN environment with high performance server systems for a well-known customer in the automotive supplier industry.

Project realization: Implementation of eight high performance SuperMicro Super Server 6028U-E1CNR4T+ systems including SAS expander technology, two Intel® Xeon® E5-2660 V3 processors, and 256GB DDR4 LRDIMM memory. Each system is equipped with 12x 4TB enterprise hard drives as well as 2x 2TB Intel DC P3600 NVMe PCIe 3.0 x4 SSDs.

SuperMicro 2U Super Server 6028U-E1CNR4T+ incl. Dual Intel Xeon E5-2600 v3 CPUs with 12x 3.5" HDD and 2x 2TB Intel DC P3600 PCIe NVMe 3.0 x4 SSD
